

FOR IMMEDIATE RELEASE

## **Wisco Calibration Services Names Daniel McLuckie to Management Team**

**PITTSBURGH, December 19, 2023** – Wisco Calibration Services Inc., a precision instrument calibration and custom panel/test fixture fabrication company, announced the appointment of Daniel McLuckie to its calibration management team. McLuckie has been with Wisco for 11 years, most recently as manager of the custom panel/test fixture fabrication segment. Before joining Wisco, McLuckie was employed as a manager of Zoll LifeVest, repair and new assemblies.

McLuckie's appointment marks an important addition to Wisco's management team, which also includes John Bluemle, Wisco president; Diane Hulings, president of Homewood Sales, Wisco's parent company; Chuck Troll, quality manager; and Lisa Valles as supervisor.

"We are delighted to welcome Daniel McLuckie to our calibration management team. His extensive experience and dedication to our company make him an invaluable asset as we continue to enhance our operations and strengthen our commitment to quality calibration services," Bluemle said.

Wisco has undergone many planned changes in recent months, including hiring more technicians and quality assurance staff, implementing improved quality control processes, and making substantial capital expenditures for new equipment. These enhancements reflect Wisco's ongoing commitment to delivering precision instrument calibration services to its clients.

"I am honored to accept this new role within Wisco. It's a testament to the company's commitment to excellence and its recognition of the importance of precision in our work. I look forward to contributing to our continued growth and success," McLuckie said.

Founded in 1970 as Westinghouse Instrument Service Co. and originally operated as a division of Westinghouse Electric Corp., Wisco Calibration Services became privately held by the Homewood Group in May 1999. Throughout this transition, the company retained its core management team and staff, ensuring the continuation of service that customers have come to rely on over the past 50+ years.
